The Y Believes...

- In the power of inspired young people
- That the science of learning tells us the best way for students to learn
- Young people's learning is an adult responsibility
- Mastery of new skills is a cornerstone of young people flourishing
- Using data enables responsive and comprehensive learning planning
- Students decide to learn with the Y
- Our work is helping young people to flourish in Body, Mind and Spirit

The Y WA

The Y WA is part of a global organisation who have been creating positive change and social impact for young people in Western Australian communities for over 110 years and across the globe since 1844.

As the Y WA continues to grow our services, we seek to connect our legacy of providing impactful community programs. We are proud this now includes The Y School as an alternative to mainstream schooling. The Y WA believes that a strong education is the foundation to young people flourishing in Body, Mind and Spirit.

The Y School

At the Y School we believe the Science of Learning tells us how students learn effectively. The staff at the Y School understand that they are responsible for providing a high-quality learning experience for all students.

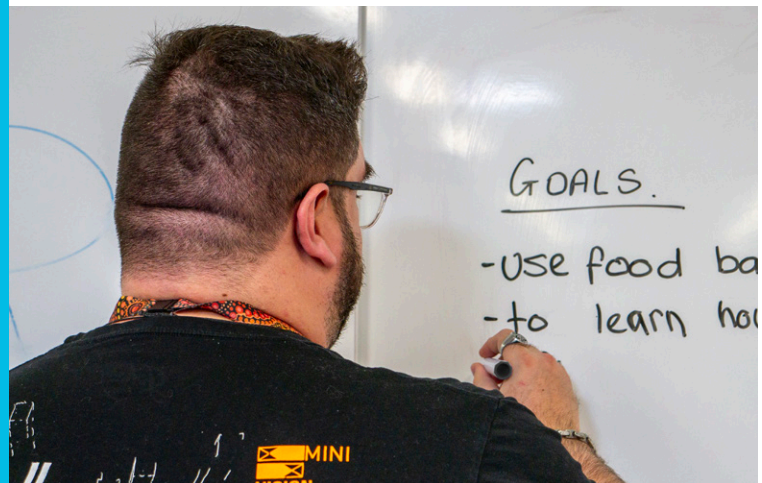
Students choose to enrol and engage in their learning in a place where everyone can belong, even if this is something that has previously been challenging.

What do we do differently?

The staff tailor programs and reflect this in Individual Education Plans that describe the educational program, how we will assess student knowledge and skills to assist young people, creating a focus on the mastery of literacy and numeracy through educational success and competence.

Our high-quality teaching enables students to progress where once they may have struggled. We focus on providing opportunities for young people to flourish, through improved educational and employment outcomes, academic mastery and psychosocial development.

Our staff recognise that connection and belonging are central to the educational success of young people. They develop professional relationships with our students to help them map their future pathways, to build and strengthen their individual characters in order to flourish as positive members of their communities.



Our Curriculum

Our WA School Senior Campuses currently enrol Year 10, 11 & 12 students.

We offer:

- Multiple pathways for success – Including WACE subjects and VET subjects
- School-Based Traineeships, TAFE enrolments and additional courses and opportunities in vocational training
- Citizenship Curriculum to help develop skills in citizenship and pro-social behaviours
- Opportunity to engage with self-led Passion Projects (Choice Activities and Clubs).

The Y School Culture

The Y School fosters connection and belonging, where all differences, genders, sexualities, cultures, religions and backgrounds are acknowledged and accepted.

We have developed a connected culture that is safe, nurturing and inclusive. Our staff take responsibility for the learning and engagement of every student at our school. Our students want to learn and make a decision to enrol at our school and to engage. We seek to support our students develop confidence and character in a caring school environment.

Our dedicated Youth Work Team and School Counsellor provide additional support for students with specific needs, collaborating to address disabilities, health and mental health conditions. Overall, we aim to provide wraparound support to ensure every student can access education positively and flourish.
